MEXICOCITY

México City is the capital of the Mexican Republic and has become the financial, cultural and political center of the country. It is one of the biggest and most populated cities in the world. Seven hundred years of history can also be appreciated among its great avenues, speedways, boulevards and skyscrapers; this is why the city shows several expressions of its traditional roots evoking a native and colonial past, together with the most refined art and architectural expressions reflecting modernity and the potential future of a growing metropolis. Its pre-Hispanic remains show the greatness of the first civilizations settled on this site. There are many greenhouses and a large market offering a variety of handcrafts. The parish of San Bernardino founded in 1535, and the Chapel of El Rosario built in the 18th Century can also be visited in this area.

Buildings & Attractions

Centro Histórico de Tlalpan (Tlalpan Historic Center)

9

This is one of the oldest neighborhoods of the city, since its history goes back to pre-Hispanic times. The center still retains much of its provincial atmosphere with narrow streets, colonial era mansions and cobblestone streets. The main attraction is the plaza filled with tall trees, shrubs and flowers. Bordering one side of the plaza is the delegation building constructed in the 19th century with a mural that pays tribute to major events in Tlalpan history, the church and ex-convent of San Augustin established here in 1547 by the Dominicans, a row of restaurants with outdoor seating overlooking the plaza, the Chapel and Convent of the Capuchinas Sacramentarias, a masterpiece by the most renowned Mexican architect Luis Barragán, and the Museum of the History of Tlalpan.

San Pedro Atocpan

11

It is a Barrio Mágico (Magical Quarter) that has managed to preserve its character of a little town and is known by its mole, one of the most representative dishes of Mexican food. Restaurants, shops and the Temple of San Martín with a beautiful facade frame the main square, with its typical kiosk. You can visit the Santuario del Señor de las Misericordias (Lord of Mercies Sanctuary), a church of great proportions with colorful stained glass windows; in its high altar is a black Christ from the 16th century made with corn cane; and from its terrace you have a panoramic view of the village. Another interesting place is The Parish of San Pedro Apostol, built in 1680 by the Franciscans friars with a large courtyard and a Baroque facade. San Pedro Atocpan is the starting point for several routes, as the nearby villages offer varied experiences such as: temezcal, the use of medicinal plants, handicrafts, natural wonders and much more.

Walking through the streets of this town one can delight in the aromas of spice shops, flowers, chilies and chocolate aromas that fill the whole place.

San Andrés Mixquic

10

You can visit the church and ex-monastery of San Andres Apostol built in the 15th century by Augustinians friars; in the courtyard of the old monastery, there are a number of pre-Hispanic archeological finds on display. Not very far is "Lago de los Reyes Aztecas" where you can have a ride in a "trajinera" enjoying the typical food; and to learn about the traditional way of living in this town, you may visit the live museum placed in a "chinampa".

A community located in the southeast of the city. It is best known for its Day of the Dead commemorations, when the cemetery that surrounds the community's main church glows with thousands of candles and smell pungent incense, a real magical atmosphere.
